The year 2020 marks 60 years since the construction and operation of the first laser. SPIE pays tribute to the many scientists and engineers who have changed lives with the development of this technology.

The Nobel Prizes for laser related discoveries include:

1960: **Ruby Laser**
- **Nobelist**
- **Institute**

1964: **Optical Solitons**
- **Nobelist**
- **Institute**

1969: **Continuous-Wave Semiconductor Lasers**
- **Nobelist**
- **Institute**

1978: **Quantum Optics**
- **Nobelist**
- **Institute**

1981: **Nonlinear Optics**
- **Nobelist**
- **Institute**

1985: **Chirped Pulse Amplification**
- **Nobelist**
- **Institute**

1998: **Laser-Based Optical Frequency Comb**
- **Nobelist**
- **Institute**

The development by Ted Hännich, John Hall revolutionized frequency metrology.

Nobel Prizes for laser related discoveries

- **1964**: Optical Solitons (first Nobel Prize for laser work)
- **1981**: Nonlinear Optics
- **1985**: Chirped Pulse Amplification
- **1998**: Laser-Based Optical Frequency Comb

**Nobel Prizes**

- **1960**: Ruby Laser
- **1964**: Optical Solitons
- **1969**: Continuous-Wave Semiconductor Lasers
- **1978**: Quantum Optics
- **1981**: Nonlinear Optics
- **1985**: Chirped Pulse Amplification
- **1998**: Laser-Based Optical Frequency Comb
