3. Activities since last report

Public science fair/presentation of Lasergraffiti

During the annual “Lange Nacht der Wissenschaften” in Berlin (transl.: long night of science) members of the chapter gave several presentations to a public auditorium. Presentations included themes like “Quantum Jazz” and “Quantum Jumps” and were held for visitors to the institute. At the same time the Lasergrafitti experiment was shown and demonstrated and could be used by visitors. The setup was partially funded by the SPIE/OSA student chapter grant in 2012/2013.

Chapter Meeting

The remaining members of the student chapter met at the institute to elect a new President for the chapter and discuss further advancing of the chapter. Many members left the chapter and new members need to be recruited. New members were introduced to the possibilities of an active chapter and also reported about past events.

4. Planned future Activities

Recruitment day:

Since the chapter urgently needs new members, we plan to host a summer BBQ at the institute to attract new members and discuss possible events.

Participation in the Leadership Meeting of the SPIE in San Diego

Invited lecturer

5. Financial information:
