3. Chapter Activities

The JHU SPIE Chapter has completed the following potential activities in 2013 - 2014:

- Hosted a public lab tour for community members in summer 2013
- Hosted medical imaging workshops to pre-university students via (summer 2013, spring 2014 and summer 2014)
- Mentored 2 high school and undergraduate students in optics-related lab work
- Meetings and events advertised to the student body at Johns Hopkins
- Organized Meeting with SPIE President in Spring 2014
4. Details of Future Activities

The JHU SPIE Chapter plans to complete the following activities in 2014-2015:

1) Continue to host meetings and events that are advertised to the student body at Johns Hopkins. As a new chapter, it is important to continue our recruitment efforts and to raise awareness for optics and bio-photonics related research within JHU.

2) Invite guest speakers for seminars and informal student lunch meetings

3) Collaborate with nearby SPIE student chapters

4) Initiate Year of Light projects and involve both the JHU community and the public.

5. Financial Information

1) Beginning balance in 2012:

$0 (new student chapter since 2013)

2) Funds raised and expended (2013-2014):

In 2013, we were approved for a $700 check for the SPIE Student Chapter. Due to personnel changes, we were unable to deposit the $700 check into the JHU Account. We originally transferred the check to an administrator at our department at Johns Hopkins, in the hopes of opening up a JHU account for our SPIE student chapter. Due to tax concerns (if deposited directly, the university will deduct $200 tax from the SPIE check), the administrator held onto the check and intended to find another legal option to minimize tax deductions from our budget. Unfortunately, the administrator has since departed the department and we were not aware of the personnel change until after the fact.

In the past year, we primarily funded our activities through the following ways:

a) Funding from JHU Graduate Student Association (approximately $100)
b) Photocopying and other resources provided JHU Student Affairs (Workshops)
c) Some out-of-pocket expenses (food)
d) Lab resources (lab tour, mentoring undergrad/high school student)
e) SPIE reimbursements for SPIE President visit to JHU
*For future funding, would it be possible to receive the funding on a reimbursement basis (instead of through a check)? Alternatively, we can deposit the check directly next year, but will incur a $200 tax deduction from the budget. Please let us know and thank you so much!

3) **Details of SPIE funding received:**

$700 - check from SPIE (never deposited; please view section 2 for explanation)

$307 - lunch and dinner events with SPIE President

4) **Other sources (please specify):**

Please refer to section 2

5) **Ending Balance:**

$700 check (never deposited; please view section 2 for explanation)
