# Chapter Activities

The SPIE Student Chapter at Utah State University performed different activities to enforce the relations between members. To accomplish that objective, our main tasks were:

- Be involved in recruiting events
- Be involved in outreach activities
- Support College of Engineering events
- Develop a SPIE Seminar on Optics Research

These tasks helped our student chapter be known by both the students and Colleges of Engineering & Science. This was also done through coordinations with our Chapter Advisor, who is also part of the Space Dynamic Laboratory.
