SPIE exhibitions provide targeted audiences to make profitable connections

BRAND EXPOSURE—Gain the visibility that keeps your company top-of-mind with prospects and customers. Nothing replaces the quality, face-to-face interactions of SPIE Exhibitions.

TOOLS TO GROW REVENUE—Take advantage of advertising opportunities, become a sponsor, and book early to maximize traffic at your booth. Exhibiting with SPIE is a proven way to add solid prospects to your sales pipeline.

A PREQUALIFIED AUDIENCE—Build your marketing plan around the industry’s leading exhibitions where you will meet people who are looking for your products and solutions. Let the SPIE sales team help you find the exhibitions that are the best fit for your business.

SPIE exhibitions connect suppliers with customers and shine a light on newest products, innovations, and latest technologies. The co-located technical conferences organized by SPIE attract scientists, engineers, system integrators, and buyers from around the world.

Be found by customers who are actively seeking your solutions

SPIE SECURITY+ DEFENCE
13–16 September 2021
Triennial
EXHIBITION
14–15 September 2021
SPIE Security + Defence is co-located with SPIE Remote Sensing allowing access to two qualified groups of potential customers. SPIE Remote Sensing offers comprehensive coverage of scientific topics, applications, sensor systems, data analysis, and satellite platforms.

SPIE PHOTOMASK + TECHNOLOGY + EUV LITHOGRAPHY
26–30 September 2021
EXHIBITION
28–29 September 2021
Be seen at the industry's premier meeting for mask makers, EUVL, emerging technologies, and mask business. Make sure you are represented among the top suppliers showcasing the newest products, innovations, and latest technologies.

SPIE OPTIFAB
18–21 October 2021
Biennial
EXHIBITION
19–21 October 2021
SPIE Optifab is the largest optical fabrication event in North America. Optical fabrication solution providers come from across the world to showcase optical manufacturing technology, including equipment, machines, tools, materials, instrumentation, metrology, and processes.

SPIE OPTIFAB
22–27 January 2022
EXHIBITION
25–27 January 2022
SPIE Photonics West is the global photonics marketplace. Every year more products are launched, more deals are made, and more collaboration occurs at Photonics West, the flagship event for the photonics and laser industry. The conferences, courses, and exhibition-plus after-hours business opportunities—make this a must-attend event.

SPIE OPTIFAB
22–27 January 2022
EXHIBITION
22–23 January 2022
BIOS
BIOS EXPO is the ideal place to interact with the developers and early adopters of the newest bioscience technologies and potential high-volume customers, making this the best venue to introduce technologies and instrumentation for diagnostics, therapeutics, and imaging.

SPIE AR/VR/MR
23–25 January 2022
EXHIBITION
24–25 January 2022
Exhibit at SPIE AR | VR | MR to meet with the biggest names in consumer electronics and up-and-coming XR companies. Featuring the latest AR VR headset technologies, optical design, sensing and display technologies, materials engineering, and more.

SPIE ADVANCED LITHOGRAPHY+ PATTERNING
27 February–3 March 2022
EXHIBITION
1–2 March 2022
The Advanced Lithography + Patternning exhibition showcases the latest innovations in IC design, fabrication, processing, and manufacturing to industry and technical leaders from leading organizations from around the world. Exhibiting in Silicon Valley is always advantageous—if it’s a market primed for your products.

SPIE DEFENSE+ COMMERCIAL SENSING
3–7 April 2022
EXHIBITION
5–7 April 2022
Strengthens your sales pipeline at the largest exhibition on sensing, imaging, and infrared technologies. Exhibit at SPIE Defense + Commercial Sensing to interact one-on-one with buyers and sensing system users from the world’s largest defense and security companies, research organizations, and government departments.

SPIE PHOTONICS EUROPE
3–7 April 2022
Biennial
EXHIBITION
5–6 April 2022
Companies share the latest innovations in detection, imaging, sensing, lasers, and their supporting components and devices. Meet people working in micro/nano technologies, biophotonics, photonic components, lasers, and photonics for industrial applications.

SPIE. OPTO+ ELECTRONICS
April 2023
Biennial
EXHIBITION
April 2023
SPIE Optics + Optoelectronics highlights the technologies that drive Europe’s largest optoelectronic infrastructure projects, such as HIASE, and EU Beamlines, plus conferences and workshops on laser acceleration, FELs, X-ray and EUV optics, nonlinear optics, and more. This growing event will help you find new prospects among nearly 800 attendees.

SPIE ASTRONOMICAL TELESCOPES + INSTRUMENTATION
17–22 July 2022
Biennial
EXHIBITION
19–21 July 2022
Be part of this premier gathering of astronomical telescope engineers and instrumentation developers. Meet project and program managers, applied researchers, designers and systems engineers for instrumentation, ground- and space-based telescopes, detectors, materials, adaptive optics, lenses and mirrors, and more.
