SPIE. ADVANCED LITHOGRAPHY+ PATTERNING

25–29 February 2024
San Jose, California, United States

Students:
Learn about the exciting careers in the semiconductor industry

Experience this conference for free with a
Student Grant

Network. Learn. Grow your career.

It's global.
The conference attendance, like the industry, is worldwide.

65% North America

14% Europe

19% Asia

SPIE Advanced Lithography + Patterning is the global conference for emerging technology in the semiconductor industry, showcasing:

- Optical and EUV lithography
- Patterning technologies
- Metrology
- Process integration for semiconductor manufacturing and adjacent applications
