## Errata to First Printing <br> Fundamentals of Polarimetric Remote Sensing <br> John R. Schott <br> (2009) SPIE Press

| Page | Location | Recommended Change |
| :---: | :---: | :---: |
| $21+22$ | Equation 3.1 and 3.3 | Change $\varepsilon_{\mathrm{x}}$ to $\varepsilon_{\mathrm{x}}(z, t, \lambda)$ and add units of [V/m] at the end |
| $21+22$ | Equation 3.2 and 3.4 | Change $\varepsilon_{\mathrm{y}}$ to $\varepsilon_{\mathrm{y}}(z, t, \lambda)$ and add units of [V/m] at the end |
| 21 | $5^{\text {th }}$ line from bottom | Change "angular frequency" to "angular temporal frequency [rad/sec]" |
| 21 | $5^{\text {th }}$ line from bottom | Change " $v$ " to " $v=c / \lambda$ " |
| 21 | $4^{\text {th }}$ line from bottom | Change " $k=\omega / c$ " to " $k=\omega / c$ is the angular spatial frequency [ $\mathrm{rad} / \mathrm{m}]$ " |
| 22 | Figure 3.1 | Add units on $\mathbf{x}$ and $\mathbf{y}$ axes of "[V/m]" and on $\mathbf{z}$ axis of "[m]" |
| 22 | Figure 3.1 | Change " $\varepsilon$ " to " $\varepsilon$ " |
| 23 | Figure 3.2 | Change two " $\varnothing$ " symbols to " $\phi$ " |
| 23 | Line 3 | Change "two sources" to "two secondary sources" |
| 23 | Line 4 | Change "source 1 " to "secondary source $1\left(\mathrm{SS}_{1}\right)$ " and change "source 2" to "secondary source $2\left(\mathrm{SS}_{2}\right)$ " |
| 23-25 | Equation 3.6, 3.7, | Add units of [V/m] at the end |
| 23 | Figure 3.3 | Change " $\mathrm{S}_{1}$ " to " $\mathrm{SS}_{1}$ " and change " $\mathrm{S}_{2}$ " to " $\mathrm{SS}_{2}$ " to eliminate confusion with Stokes parameters, and change " o " on screen to " o " " |
| 25 | Equation 3.12 | Change " $=\left(\varepsilon_{0}{ }^{2} / 2\right) \cdot I_{0} "$ to " $=\varepsilon_{0}{ }^{2} / 2=I_{0} "$ and add units of $\left[\mathrm{V}^{2} / \mathrm{m}^{2}\right]$ at the end |
| 25 | Equation 3.14 | Add units of $\left[\mathrm{V}^{2} / \mathrm{m}^{2}\right]$ at the end |
| 25 | $2^{\text {nd }}$ line from bottom | Change " $\Delta l=l_{1}-l_{2}$ " to " $\Delta l=l_{2}-l_{1}$ " |
| 25-26 | $\begin{aligned} & \text { Equations } 3.15 \mathrm{a}, \\ & 3.15 \mathrm{~b}, 3.16,3.17 \end{aligned}$ | Add units of $\left[\mathrm{m}^{2}\right]$ at the end |
| 26-27 | $\begin{aligned} & \text { Equations } 3.18 \text {, } \\ & 3.19,3.22,3.23 \\ & \hline \end{aligned}$ | Add units of [m] at the end |
| 27 | Equation 3.25 | add units of [V/m] at the end |
| 27 | Equation 3.26 | add units of [V/m] at the end |
| 27 | $2^{\text {nd }}$ line from bottom | Change "are the phases" to "are the constant phases" |
| 29 | Line 2 | Change "an ellipse rotated through an angle" to "an ellipse with major axis oriented at an angle" |
| 29 | Lines $8+17$ | Change "(cf. Fig. 3.1)" to "(Fig. 3.1)" and change "(cf. Fig. 3.8)" to "(Fig. 3.8)" |
| 29 | Line 12 | Change "in a single plane." to "in a single plane (Fig. 3.8a)." |
| 29 | Last Line | Change "this convention" to "this convention (fixed-plane rotation as seen by the receiver)" |
| 30 | Line 1 | Change "the opposite convention" to "the opposite convention (rotation as seen by the transmitter)" |
| 31 | Line $1+2$ | Change "orientation angle" to "field rotation angle" in 2 places |
| 31 | Equations 3.30a, 3.30b, 3.31a, 3.31b, and 3.32 | Add units of [V/m] at the end |
| 31 | $2^{\text {nd }}$ line from bottom | Change " $\phi=\pi / 2$ or $\phi=(3 / 2) \pi$ " to " $\phi= \pm \pi / 2$ " |
| 32 | Line 4 | Change " $\phi=(3 / 2$ ) $\pi$ " to " $\phi=-\pi / 2$ " |

| 33+34 | Equation 4.2 and 4.7 | Add units of $\left[\mathrm{V}^{4} / \mathrm{m}^{4}\right]$ at the end |
| :---: | :---: | :---: |
| 33-37 | Equations 4.3 through 4.6, 4.10 through 4.23 | Add units of $\left[\mathrm{V}^{2} / \mathrm{m}^{2}\right]$ at the end |
| 34 | Line 13 | Change "yielding" to "yielding using the four-quadrant arctangent" |
| 35 | Line 4 | Change " $\phi=(3 / 2) \pi$ " to " $\phi=-\pi / 2$ " |
| 40 | Figure 4.2 | Add $\mathrm{S}_{3}=0$ to Pickering, Modified Pickering, and Fessenkov's methods |
| 40 | Figure 4.2 | Change Fessenkov's method to $\mathrm{S}_{1}=(2 / 3) \cdot\left(2 \cdot \mathrm{E}_{0^{\circ}}-\mathrm{E}_{60^{\circ}}-\mathrm{E}_{120^{\circ}}\right)$ and $S_{2}=-(2 / \sqrt{3}) \cdot\left(E_{120^{\circ}}-E_{60^{\circ}}\right)$ |
| 40 | Table 4.1 | Add line "S $0_{0}$ - Always - Never" |
| 41 | Figure 4.3 Caption | Change "Stokes Vectors" to "Common Normalized Stokes Vectors" |
| 45 | Figure 4.6 Caption | Change " y " to " $\psi$ " |
| 57 | Figure 5.5 | Change five " $\varnothing$ " symbols to " $\phi$ " |
| 58 | Equation 5.19 | Change " $\chi_{\varnothing}$ " to " $\mathrm{T}_{\varnothing}$ " (i.e., $45^{\circ}$ sloped line completely inside circle) |
| $59+60$ | Equation 5.28 and 5.29a | Change " $\mathbf{M}_{\varnothing=90}$ " to " $\mathbf{M}_{\phi=90}$ " |
| 65 | Figure 6.2 | Change " $\boldsymbol{L}\left(\theta_{r}, \phi_{r 0}\right)$ " to " $\boldsymbol{L}\left(\theta_{r}, \phi_{r}\right)$ " |
| 67 | Equation 6.6b | Make $f$ bold (i.e., $f$ ) |
| 68 | Equation 6.7 | Add units of [W/m²/rr] |
| 68 | Equation 6.8 | Add units of [W/ $\mathrm{m}^{2}$ ] |
| 75 | $3{ }^{\text {rd }}$ line from bottom | Change "Coulson (1998)" to "Coulson (1988)" |
| 85 | Equation 6.25 | Add arrow notation above $\boldsymbol{E}$ Stokes vector |
| 88 | Equation 6.38g | Change to $f_{20}=2 \circledast \oslash-\circledast \circledast$ |
| 103 | $8^{\text {th }}$ reference | Remove redundant "Nadal, F." author |
| 111 | Line 14+15 | Change "an error term" to "a residual error term" |
| 168 | Line 8 | Change "according to" to "according to the modified Pickering method" |
| 169 | Line 21 | Change "[Gaskill (1979)]" to "[Gaskill (1978)]" |
| 170 | Figure 10.3 Caption | Change "BRFV" to "BRVF" |
| 196 | Figure 11.6 Caption | Change "of a GPS" to "of a GPS satellite vehicle" |
| 200 | Equation 11.3 | Change $P(, \sigma, B)$ to $P\left(\theta_{N}, \sigma, B\right)$ |
| 245 | Line 5 of Author's Bio | Change "Unites States" to "United States" |
